 February 2019, CZ-GE Day of Applied Science

 Call 4 in a nutshell

 Interreg CENTRAL EUROPE, Ministry of Regional Development (CZ), Stella Horvathova

Interreg CENTRAL EUROPE programme features

- Builds on transnational cooperation bringing together people from 9 central European countries
- Its projects improve **capacities of public authorities and practitioners** to make their cities and regions stronger
- Helps regions and cities **to better cope with challenges** → from the reduction of heat in cities, cleaner air and water to the prevention of future floods

Call objective

What should the programme achieve with the fourth call?

- Projects funded within the fourth call should **take up and capitalise existing CE project results** at the territorial (downstream) and policy (upstream) levels

We open the call from 4 March to 5 July 2019

17.01.2019

UPDATE ON CALLS

EXPERIMENTAL CALL COMING NEXT

We will launch an experimental call on 4 March 2019. The aim will be to capitalise on results of our already funded projects. We will also encourage closer coordination with new partners from other EU funding instruments such as Horizon 2020 or LIFE.

ABOUT US

CALLS

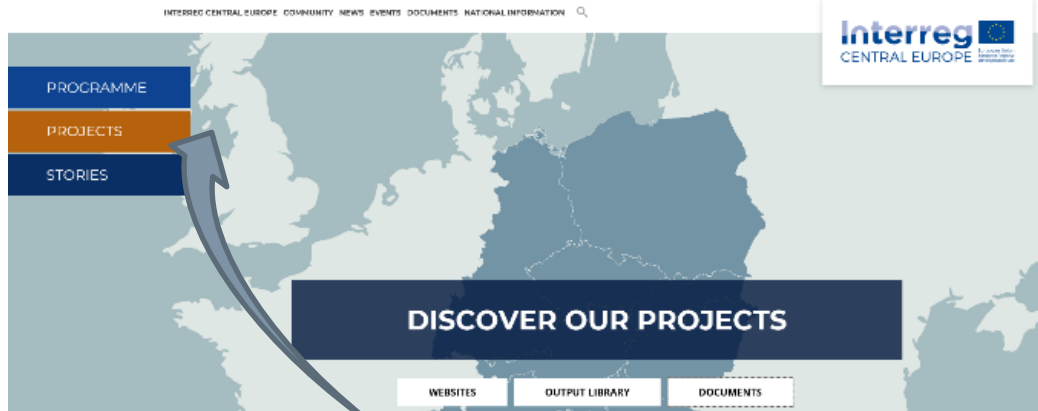

PROGRAMME IN NUMBERS

PRIORITIES

PUBLICATIONS

CONTACT

Website / PROJECTS

- Xls. chart **LIST OF OPERATIONS available** includes the basic description of projects and project partners involved

- **PROJECT WEBSITES** listed according to **4 PRIORITIES**

We want to take our project results forward

Project partnerships should **exploit promising project outputs and results** of already funded Interreg CENTRAL EUROPE projects.

The new partnerships should **roll out outputs and results** at the regional and local level, or use them to **improve policy making**.

Project ideas have to **build on complementary results and outputs from at least 3 different projects** that are co-financed by Interreg CENTRAL EUROPE and directly-managed EU programmes such as Horizon 2020, LIFE, Connecting Europe Facility, etc. At least two of the three projects have to be from Interreg CENTRAL EUROPE.

We aim at capitalisation through coordination

We are looking for a **mix of Interreg CENTRAL EUROPE stakeholders and newcomers** from projects funded under directly-managed EU programmes.

We believe that **cooperation beyond our Interreg community** will be central to make results of our currently funded Interreg CENTRAL EUROPE projects even more effective. Additional partners from other Interreg projects, projects funded by mainstreaming programmes as well as complete newcomers are welcome.

The **application manual with examples of potential project ideas** will be published when the call launches on 4 March.

4th call framework

- Pre-selection of topics by the MC (in January 2019, on the basis of MA/JS analytical work)

4th call framework

- Partners of the Interreg CE projects (belonging to 7 topics) to be exploited

- ERDF co-financing rate

Maximum ERDF co-financing rate	80 %	85 %	80 %	NO ERDF CO-FINANCING PARTICIPATION WITH OWN FUNDS
Member State	Austria, Germany, Italy	Croatia, Czech Republic, Hungary, Poland, Slovakia, Slovenia	Outside Interreg CENTRAL EUROPE programme area but inside the EU	Outside the EU

- Call timeline → project selection **within the year**
- Project duration → depending on the shape of the call, however latest project end is **30.06.2022**

- Application manual

We offer support on various levels

SUPPORT

EVENTS

To support partner search among Interreg CENTRAL EUROPE beneficiaries and to exchange on project outputs and results, we will organise **thematic workshops in Vienna on 2-3 April 2019**.

Matchmaking between Interreg CENTRAL EUROPE beneficiaries and research stakeholders that participate in FP7/H2020 projects will be facilitated in May in an **Info Day organised by the European Commission in Brussels**.

More information will follow soon.

SUPPORT

PARTNER SEARCH

The partner search and matchmaking events will be complemented by digital measures.

The main tool will be our **online project idea community**, which will be launched when the call opens. This will be complemented by our **LinkedIn group for partner search**, which was established in 2016 and has nearly 1000 members. Information on the call will be published here and applicants can publish project ideas and exchange at any given time.

More information will follow soon.

SUPPORT

TRAINING

Building on positive experiences made in previous calls, our applicant training will be completely shifted to digital. **Video tutorials will be published regularly on our YouTube channel.**

The programme website will be the place where to find comprehensive information on the call. FAQs will be updated and all relevant documents will be available on www.interreg-central.eu/apply.

Information on how to develop an application will be available when you need it the most.

SUPPORT

CONSULTATION

Our digital approach to building capacities will be complemented by individual support on the national and transnational level.

The **network of National Contact Points** will provide support in **national languages** on primarily national application issues.

We will also offer **compulsory individual consultations** (as phone or video conferences) to lead applicants. These can be booked as of mid-April 2019 until one week before the closure of the call.

E-MOBILITY

ROLLING OUT MODERN E-MOBILITY

Eberswalde is a small town in East Germany that deserves to be known for at least two historic events: In 1923, the world's first ever radio concert was broadcast from here. And in 2012, Europe's first trolley-battery-hybrid-bus started operating here powered by a modern lithium-ion battery. This marked a major step forward in modern e-mobility thanks to cooperation in our TROLLEY project.

Six years on, Eberswalde will again make history. A feasibility study, which

ACTIVITY

UPCOMING TASKS

The year 2018 was under the sign of surveying and digitization of our pilot heritage sites. But in some cases field work still goes on like in Puck with our team diving in Winter (klick here).

Now, virtual reconstructions and finishing of mobile app visualizations are the major tasks for the next months as well as addressing certain stakeholders and local communities.
